

Sensory I-Spy

Use these ideas to play a new version of I-Spy that goes beyond colors.

Can you think of other ways to describe items around your home or yard using all five senses? You can make your own sensory box or bucket and see how many ways you can describe the same items without repeating.

**Say: “I-spy, I-spy with my little eye,
something....”**

For example: Fluffy can describe a feather but also the clouds or a seeded dandelion flower. The ideas are endless.
