Ranger Rick's Nature Notebook

GARDEN SURVEY

To grow vegetable gardens, fruit trees, and other kinds of food, people have to work with nature. What kinds of edible things are growing in your neighborhood?

| Keep a Record! | Helpful Things to Take Along |
|------------------------------------|------------------------------|
| Date Time _ Location Weather | |

Try this:

- 1. Take a stroll around your neighborhood and see what edible plants you can see.
- 2. Better yet, ask some neighbors to take you on a tour of their gardens. Ask:
 - What kinds of food do you grow?
 - What have you learned about nature from your gardens?

Draw some pictures or make some notes about what you find out in the box below.
